

Indeed, every link in the food supply chain from the farm to the shelf plays a valuable role in delivering a safe product to consumers, and I believe each link requires flexibility in order to continue to provide high-quality, competitively priced goods to American consumers. A dutiful producer should expect unwarranted government intrusion no more than a consumer should expect their next meal will make them sick.

The detrimental consequences of an overly onerous federal government and bureaucratic red-tape must be carefully weighed against the need for regulation to ensure safe foods. That being said, H.R. 2749 does attempt to find a balance. As a result, the bill has earned the support of a wide range of stakeholders from farm groups to distributors.

Madam Speaker, while I stress the importance of continued work to improve the bill, I support its passage and urge my colleagues to do the same.

#### EARMARK DECLARATION

### HON. TRENT FRANKS

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Friday, July 31, 2009*

Mr. FRANKS of Arizona. Madam Speaker, pursuant to the Republican Leadership standards on budget requests, I am submitting the following information regarding budget designations I received as part of H.R. 3326: FY 2010 Defense Appropriations Bill.

(1) Recipient: Robertson Aviation

Budget Designation: \$3,000,000

This designation funds the procurement of internal 200 gallon A-kits and B-kits for installation on UH-60 Black Hawk helicopters operated by the Army National Guard. The Internal Auxiliary Fuel Tank System is a crashworthy, ballistically self-sealing, single-point pressure refuelable internal auxiliary fuel system that has been developed and fielded to H-60 helicopters operated by the U.S. Army Special Operations, the U.S. Navy, U.S. Air Force Combat Search and Rescue, and certain units of the U.S. Army National Guard. Having this system installed on an H-60 helicopter saves lives by reducing the risk of post crash fires by using military standard crashworthy self sealing bladders integrated into rugged aluminum honeycomb fiberglass outer containers. The resulting system provides ballistic protection for aircrews operating in hostile environments and crashworthy protection for all operations.

(2) Recipient: Southwest Gas Corporation

Budget Designation: \$3,000,000

This funding request is for a Gas Engine Heat Pump (GEDAC) demonstration. GEDAC provides essential peak electric and winter gas load reduction. GEDACs not only provide increased energy efficiency, reduced peak electricity demand, costs savings to the U.S. military, resource reductions (water), and reduction of greenhouse gas emissions, it also diversifies energy sources and provides the foundation for grid independence in electricity production. This type of energy independence is invaluable to a military installation, or other facility of national interest, that has to continue to function in the event of a national emergency.

(3) Proposed Recipient: USAF, Air Education and Training Command

Budget Designation: \$1,500,000

This funding request is for Air Education & Training Command (AETC) aircraft range upgrades, specifically Barry M. Goldwater Range (BMGR) improvement projects. Air Education and Training Command ranges have an unfunded requirement for enhancements to bring them more in line with the operational capabilities of the F-35. The Barry M. Goldwater Range has an identified unfunded requirement to secure a sensor training area and new instrumented target area as well as two ground moving target sets to conduct real world training which mirrors Global War on Terror requirements. Acquisition of ground moving targets, and development of a sensor training area/instrumented target area within the Barry M. Goldwater Tactical Range addresses the operational requirements which F-16 and future pilots (F-35) will face in defeating urban and moving targets with high precision.

(4) Proposed Recipient: Advanced Ceramics

Budget Designation: \$2,000,000

This funding request supports efforts at the U.S. Army Battle Command Battle laboratory at Ft. Huachuca to aggressively pursue experimental deployment efforts and spiral development of sensor and micro-transponder technologies using the Silver Fox and Manta unmanned aerial systems (UAS). Silver Fox and Manta systems' uniquely compact size and stealth technology coupled with the use of advanced sensors and transponders enable them to detect, track, and isolate the smallest enemy movements, including the emplacement of improvised explosive devices (IEDs)—the enemy's weapon of choice against our troops in Iraq and Afghanistan.

#### RECOGNIZING THE EXTRAORDINARY SERVICE OF THE UNITED STATES COAST GUARD AND THE "JERSEY BOYS OF THE USCGC MUNRO"

### HON. STEVEN R. ROTHMAN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Friday, July 31, 2009*

Mr. ROTHMAN of New Jersey. Madam Speaker, I rise today in recognition of the United States Coast Guard, and the dedicated service men and women who provide invaluable service to our country. I would especially like to recognize Lieutenant Junior Grade Paul Windt of Paramus, Lieutenant Junior Grade Lee Crusius of Hackensack, Boatswain's Mate 3rd Class Daniel McGrath of West Milford, and Electronics Technician 2nd Class Lorin Fisher of Jersey City, whose efforts during a heroic rescue on March 28, 2008 saved the lives of 42 fishermen in the Alaskan Sea. These 4 brave crew members of the Coast Guard Cutter Munro, who go by the name 'The Jersey Boys of the USCGC Munro,' are New Jersey natives and deserve recognition and commendation for their brave and selfless actions that day.

Following in the Coast Guard's rich tradition of service to the American people, these young men, away from their homes and families on Easter morning of 2008, were called to action to rescue the crew of a sinking ship. They battled minus 24-degree weather and a pitching sea which threatened to throw them overboard, while transporting the freezing

crew of the sinking ship aboard the *Munro*. Thanks to the heroics of these brave men, 42 of the 47 fishermen aboard the sinking ship survived that frigid morning in March 2008.

Madam Speaker, I ask my colleagues to join with me today in commending the thousands of Americans who serve and have served in the United States Coast Guard. They are a great credit to our country.

#### GENERAL SUPPORT OF VETERAN BILLS FOR WEEK OF JULY 27

### HON. MAXINE WATERS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Friday, July 31, 2009*

Ms. WATERS. Madam Speaker, I rise in strong support for the veterans' bills considered on the floor this week. I am very pleased that we have reached a point where we can begin to address the many institutional problems our returning soldiers endure under the Department of Veteran Affairs. While some of these issues can be attributed to administrative deficiencies, many of the department's problems can be helped by increased federal support. These brave men and women deserve our support as they risk their lives in combat. This support should be reflected in appropriate legislative action to ease the burdens they confront upon returning home. While many of us in Congress may disagree on our military strategy and presence in Iraq and Afghanistan, we can all agree that our returning veterans deserve far more than what they have received upon returning home from combat.

Although the Bush Administration initiated the wars in Iraq and Afghanistan, it failed to provide for critical veterans' health care benefits and programs that would have helped to reorient our returning troops into society. However, under a new administration and as evidenced by the bills considered this week, Congress is working diligently to introduce and pass critical legislation that will provide our veterans with long overdue support and efficient access to medical resources. Therefore, I am pleased to support all of the veterans' bills on the floor this week, and I commend my colleagues in Congress for their commitment to our nation's troops.

A New York Times report published last fall reported that the nation's newest veterans, particularly the wounded, are paying an exceptionally high price for their service to our country. According to various veterans' advocacy groups, the combination of injury and unemployment coupled with the long VA disability claims process has forced many veterans into foreclosure and other financial hardships. Thus, the legislation on the floor this week will provide for beneficial assistance through federal appropriations, employment and housing resources, and improved veterans' medical insurance programs.

H.R. 3219, the Veterans' Insurance and Health Care Improvements Act of 2009 will expand veterans' insurance and provide much needed healthcare improvements. Additionally, this measure establishes permanent VA authority to provide hospital care, medical services, and nursing home care to Vietnam-era herbicide-exposed veterans and Persian Gulf War veterans who have insufficient medical
